#### EXPLANATORY NOTES

Except where otherwise specified, employment figures contained in this Bulletin are based on data obtained from the 1933 Census, the Civilian Register of 1943, the Occupation Survey of 1945, Annual Censuses of Factory Production, and returns from Governmental Bodies, together with Pay-roll tax returns. Pay-roll tax returns at present cover approximately 77 per cent. of the total estimated number of wage and salary earners in civilian employment (excluding rural and female private domestics) and are lodged by all employers paying more than £200 a week in wages (other than certain Commonwealth Government Bodies, religious and benevolent institutions, public hospitals and other similar organizations specifically exempted under the Pay-roll Tax Assessment Act 1941-1957). This Act, when originally introduced in 1941, required employers paying wages of more than £20 a week to lodge returns. The exemption limit was raised to £80 a week from 1st October, 1953 and £120 a week from 1st September, 1954. The present exemption limit of £200 a week was introduced as from 1st September, 1957.

The terms "Employment", "Number Employed", "Employees" and "Wage Earners" used herein are synonymous with, and relate to, "Wage and salary earners" on pay-rolls or "In employment" in the latter part of each month as distinct from numbers of employees actually working on a specific date. They include persons employed part-time.

PREFACE

The figures relating to employment published in this Bulletin are estimates. From Bulletin No. 195, February, 1958, the estimates have incorporated actual monthly employment in factories as recorded at successive Annual Censuses of Factories to June, 1957, with interim estimates for subsequent months. (See note (a) page 8).

Call-ups for short periods of National Service Training have occurred from time to time since August, 1951, and other variations occur in numbers of personnel in the Services. These are shown in item 4 below and in Table 4 page 3 hereof.

(a) Includes all employees of Governmental Bodies (Commonwealth, State, Local and Semi-Governmental) on services such as railways, tramways, banks, post office, air transport, education, broadcasting, television, police, public works, factories and munitions establishments, migrant hostels, etc., as well as administrative employees, within Australia.

(b) Includes members of Permanent and Oversea Defence Forces and National Service Trainees in camp. Non-enlisted personnel are included to June, 1956. Rural workers and students in camp undergoing National Service Training are excluded. (c) Figures for May, 1949 have been used for purposes of annual comparison because of the effects of the coal dispute in June, 1949. (d) See Preface on page 1 hereof as to effects of fluctuations in numbers of Defence Forces and Trainees since August, 1951. \* Revised.

NOTES TO TABLES 7 AND 8

(a) Refers to estimated employment in factories as defined for the purpose of the annual production census, results of which are published in the annual bulletin, Secondary Industries. In this connexion, a factory is defined as an industrial establishment in which four or more persons are employed, or in which power, other than manual, is used. The employees covered are those engaged in manufacturing activities and exclude those engaged in selling and distribution, etc. The number of employees in factories as from Bulletin No. 195, February, 1958, represents the actual monthly employment in factories as recorded at successive annual Censuses of Factories to June, 1957, with interim estimates for subsequent months.

(b) Includes employees in industrial establishments outside the scope of the definition of a factory (given in (a) above) and persons employed by factory proprietors but engaged in selling and distribution, etc., who are excluded from figures shown opposite "Factories".

(c) Includes persons employed on private building, and employees of private employers contracting to public bodies, on building construction, alterations, maintenance and repairs.

(d) Includes employees on construction of roads, bridges, earthworks, etc., and employees directly employed by public bodies on building and maintenance of buildings.

(e) Includes Hotels, Restaurants, Hairdressing and Other Personal Services (except female private domestics).

(f) Includes the Northern Territory and the Australian Capital Territory.

(g) Includes Law and Order, Religion and Social Welfare, Health, Education, Other Professional Services, Amusement, etc., and Personal Service (Hotels, Restaurants, etc., excluding female private domestics). In respect of females only, also includes Forestry, Fishing, etc., Mining, Building and Construction.

III. EMPLOYMENT IN LARGER PRIVATE FACTORIES

By joint arrangement between the Secretary of the Department of Labour and National Service and the Commonwealth Statistician, a regular monthly survey of employment in the larger privately-owned factories of New South Wales and Victoria was instituted in January, 1952. Practically all private factories with 100 or more employees and a large section of those with between 50 and 100 employees were surveyed.

The instruction as to employees to be included in the returns was as follows:- "The number of persons employed is to include all persons on the establishment of the factory who are engaged in the factory or on the factory office staff, providing their employment is directly related to manufacture", and further "..... the number of males and females (separately) employed in the specified factory or mill. These figures are to include factory office staff, but are to exclude selling and distribution staff". The figures obtained relate to the numbers on the pay-roll as at the last pay-day in the month.

The survey was instituted to provide an earlier indication of trend of private factory employment, month by month, than is available from any other source, and in fact the trends shown in employment in these larger private factories are broadly consonant with those shown in estimates of total private factory employment, derived from Pay-roll Tax Returns, for the periods for which comparisons are available.

Employment in food-processing factories is subject to considerable seasonal variation. In view of this circumstance, the movements in "all factories excluding food factories" are given equal prominence in the tables with those in "all factories surveyed".

The survey was extended to cover all States with effect from January, 1953. In Bulletins up to and including No. 152, totals were given for the original two States, for the three remaining mainland States and for the five mainland States together. The figures now shown in Tables 9 to 12 relate to all six States.

An industrial analysis, showing movements in each of eight broad groups, is given in Table 13. In continuation of the earlier practice, this table is confined to the five mainland States. At the present stage, figures for Tasmania cannot be incorporated into this table in the same detail because of the risk of disclosure of individual factory particulars.

(a) As the number of reporting factories in the collection varies from year to year, the figures in Tables 9 to 13 are not comparable with those published in Bulletins prior to No.205, December, 1958. The figures now published for 1958 have been adjusted to make them comparable with those obtained from the 1959 collection.

(a) Includes salaries. (b) Average earnings per male unit employed. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. (c) Subject to revision. \* Revised.

NOTE:- The index numbers for "All Industries" and "Manufacturing" show the movement in average earnings over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups.

The "All Industries" index is based on Pay-roll Tax Returns and other data. The index for manufacturing industries for the years 1945-46 to 1957-58 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual factory returns. The figures subsequent to June, 1958 are preliminary estimates based on Pay-roll Tax returns.

For revised figures from September quarter, 1947, See Bulletin No. 203, October, 1958.

(a) Includes the Australian Capital Territory. (b) Includes the Northern Territory.  
(c) Total wages as above divided by total civilian employment expressed in male units. Male units equals the number of males plus a proportion of females based on the approximate ratio of female to male earnings. The same ratio has been used in each State and because the average ratio of female to male earnings may vary between States precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

NOTE:- Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

For revised figures from September Quarter, 1947, see Bulletin No. 203, October, 1958.

TABLE 16 - AVERAGE NOMINAL WEEKLY WAGE RATE INDEX NUMBERS: ADULT MALES  
INDUSTRIAL GROUPS - STATES (a)

The index numbers in the following tables are based on averages of wage rates for a full week's work obtained from awards, determinations and industrial agreements. The average rate of wage for each industrial group in each State is the arithmetical average of the rates of wage payable for specified occupations within that group. The figures for "All Groups" for each State and for each industrial group for Australia are weighted averages.

The base of each index number is the weighted average weekly wage for Australia of all industrial groups for the three years ended 30th June, 1939 = 100.

(a) The figures of nominal wages are in course of revision to meet changes in industrial structure. (b) Weighted average. (c) Average rates of wage on which index numbers are based are those prevailing at the principal mining centres in each State and exclude district allowances in the gold mining industry. (d) Average rates of wage on which index numbers are based are for occupations other than master, officers and engineers in the Merchant Marine Service, and include value of keep, where supplied.

TABLE 17 - AVERAGE NOMINAL HOURLY WAGE RATE INDEX NUMBERS : ADULT MALES, STATES (a)

The index numbers in the following table are based on average wage rates and hours of labour for a full week's work obtained from awards, determinations and industrial agreements. The average rate of wage for each State is the weighted average of the wage rates for each industrial group in the State. The average rate of wage for Australia is the weighted average of the wage rates for each State.

The base of each index number is the weighted average hourly wage for Australia for the three years ended 30th June, 1939 = 100.
